

WWT FlexShoe™ for Deepwater

EXPERIENCE THE WWT WAY TO RUN CASING.

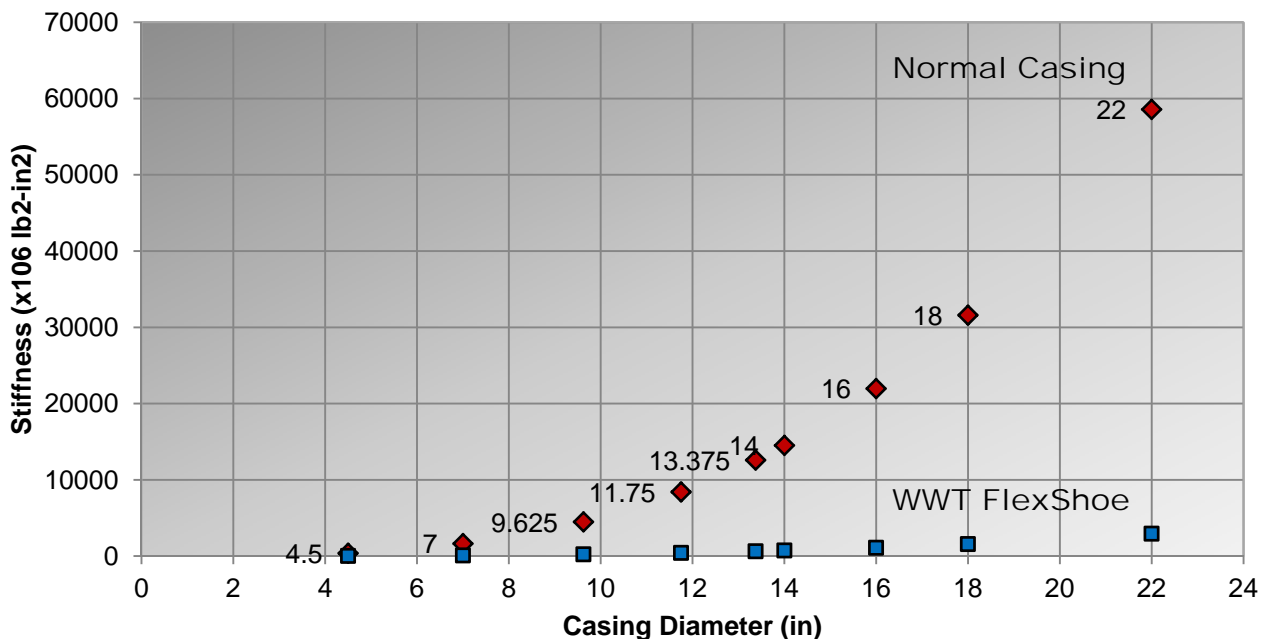

Operators have seen difficulty when running large diameter casing above 30° inclination.

The WWT FlexShoe:

- Greatly reduces loads at the bottom of the casing
- Lessens the need to rotate, ream, or fight to run casing
- Smoothly traverses ledges, windows, and dog-legs
- Provides a reliable and efficient solution to reach target depth

Casing Size vs. Stiffness

- The WWT FlexShoe has already proven that it can perform in deepwater, with multiple runs under a variety of well conditions and casing sizes.
- Large diameter WWT FlexShoes can:
 - Run through dog legs of more than 5°/100ft.
 - Take significant load without damage.
 - Help 16-inch casing run to more than 60° inclination.
 - Safely cement and drill out without any problems.
